

# WVEMS PERFORMANCE IMPROVEMENT PROJECTS FY 18

- General EMS Topic – End Tidal usage with chief complaint—observational study to see what chief complaints providers are using device on and where we need to educate providers to use it more
- EMS System Topic – Communication Barriers across localities
  - MCI Communications
  - How to communicate between hospitals
  - Schedule testing in each planning district of interoperability communication
  - Form a list of Agencies and which band and frequency they use for emergencies
  - Backup plans for radio outages
  - Communicate with air medical to find out where they are having issues with communications across region.
- Trauma Topic – GCS Reliability-have hospitals pull EMS GCS and their beginning GCS to find out if more education is necessary on GCS and if agencies are actually using GCS and using it correctly.
